EDUCATION

SRM Institute of Science and Technology KTR

B.Tech – Computer Science (CGPA: 8.75)

Kattankulathur, Chennai

Sep 2022 – Present

EXPERIENCE

Software Development

Jul 2025 – Present

Bajaj Finserv Health, Pune

- Developed and maintained a production-scale **React Native** application serving **30K+ MAU** across Android and iOS.
- Implemented end-to-end **MFA** authentication with MPIN-based verification.
- Integrated **SSO authentication** for secure session handoff between web and mobile applications.
- Designed authentication flows and built POC for **deep linking** and intent-based navigation.
- Optimized hierarchical location dropdowns across **15 instances**, improving rendering performance and reducing latency.
- Refactored a **16K-line monolith** into modular React + TypeScript architecture using custom hooks.
- Implemented **theming architecture** supporting 6 corporate clients through backend-driven branding configuration.
- Built and maintained **CI/CD pipelines** for dev, beta, and production mobile releases.
- Automated Firebase tester distributions and **TestFlight workflows** for streamlined deployments.
- Implemented **preview environments** with per-PR container deployments and isolated routing URLs.
- Built containerized deployment pipelines using **Docker** and Nomad.
- Resolved critical **iOS build** failures on Xcode 26 using custom Swift patching workflows.
- Supported development and modernization of internal enterprise portals across provider and HR workflows.

Software Development

Aug 2024 – Sep 2024

NovaFocus, Bangalore / Remote

- Integrated **AI-based content filtering** in a browser extension to dynamically control user feed content.
- Migrated frontend architecture from Vue.js to **React.js**, improving maintainability and component reusability.
- Implemented **Razorpay payments** and built a cross-tab synchronization system to maintain timers and user focus across browser tabs.

Software Development

Apr 2024 – Jul 2024

Neugence, California / Remote

- Built multi-provider **Firebase authentication** and developed scalable RESTful APIs.
- Developed a Calendly-like scheduling system for internal team coordination.
- Created custom markdown-based UI templates for quiz and article catalog features.

PROJECTS

Reverse Tunnel Infrastructure Setup | *Linux, Cloudflare, DNS, Systemd, Networking*

[article](#)

- Built a persistent reverse-tunnel setup exposing local services publicly without port forwarding using **Tunnel**.
- Configured automated recovery using **systemd**, persistent DNS routing, and reboot-safe service orchestration.
- Implemented secure outbound tunnel mapping between local applications and Cloudflare Edge using named tunnels and DNS-based routing.
- Integrated local service forwarding from **localhost:3000** to a custom domain with automatic tunnel recovery on reboot.

Who Knows Better | *Next.js, Socket.io, AWS (S3, EC2), Azure, Nginx, Selenium, Docker*

[link](#)

- Built a real-time quiz platform serving **9K+ weekly users** with **2K peak concurrent connections**.
- Designed and deployed multi-cloud load balancing across Vercel Edge, AWS EC2, and Azure using Nginx.
- Automated Instagram and Twitter growth workflows using Selenium, including auto-follow, commenting, and scheduled posting.

AWARDS & HONORS

- **Excellence Award** at PU Code Hackathon 2025, Parul University (750+ participants).
- **1st Place** out of 300+ participants in the House of Coders and HackSummit Hackathon, SRMIST Chennai.

SKILLS & TOOLS

Languages: JavaScript (ES6+), TypeScript, C/C++, Python

Frameworks / Libraries: React.js, React Native (Expo), Next.js, Node.js, Express.js, Socket.io, Zustand

DevOps & Infrastructure: Docker, HashiCorp Nomad, Caddy, Nginx, Reverse Proxy Routing

Cloud & Tools: AWS (Lambda, S3, ECS, API Gateway), Azure, Firebase, Git/GitHub, Vercel, Selenium

Development: RESTful APIs, JWT, WebSockets, SSR, CI/CD (GitHub Actions), Testing (Jest, Cypress)
